In addition, you are hereby notified that the Court has entered an order requiring you to file an objection with the Court if you disagree with the State's proposed determination of the the irrigation water requirements for surface water irrigation use in Section 5 (Rio Gallina) as described below:

The term "Consumptive Irrigation Requirement" (CIR) refers to the quantity of water, expressed in acre-feet per year, exclusive of effective precipitation, that is consumptively used by plants or is evaporated from the soil surface during one calendar year. The term "Farm Delivery Requirement" (FDR) refers to the quantity of water expressed in acre-feet per acre per year, exclusive of effective precipitation, delivered to the farm headgate or which is diverted from a source of water which originates on the farm itself, such as a well or spring, necessary to satisfy the consumptive irrigation requirements of crops grown on a farm in one calendar year. The

“Project Diversion Requirement” (PDR) or off-farm diversion requirement is defined as the quantity of water, exclusive of effective precipitation, which is diverted from the stream or an off-farm source to satisfy the farm delivery requirement for one calendar year. The irrigation water requirements set forth above do not include diversion requirements associated with stockponds or other impoundments determined to have valid water rights in these proceedings.

If you agree with the priority dates and irrigation water requirements described above, you do not need to take any action, and the Court will enter an order that recognizes the elements of your water rights and the water rights of other surface water users in Section 5 as described above. If you disagree, you must follow the instructions below.

This will be your only opportunity in these proceedings to object to the determination of priority dates or irrigation water requirements in Section 5. Subsequent *inter se* proceedings in Section 5 will not include the opportunity to object to those determinations
